

Sprint 2 Report
Event Hub
2/8/2022

Actions to stop doing:

- The team should work on not marking a task as complete until all work on it is fully completed.
- The team should stop working on tasks outside of the scope of the sprint.

Actions to start doing:

- The team members should start providing how many hours it actually took them to complete tasks. That way we can add this to the burn-up chart and see how well our estimates of time are matching real time spent on tasks.
- The team should start giving more thought to the visual design of a feature alongside its functionality.
- The team should start documenting their code for clarification and readability
- The team should start tasks earlier to balance the workload

Actions to keep doing:

- The team should keep communicating on discord and updating group members with the progress they've made on tasks.
- The team should keep asking clarifying questions if unsure about how to go about a task or about the task's details.
- The team should keep on maintaining clear code organization to ensure clarity among team members.
- The team should continue testing the main branch whenever new features are pushed onto it to ensure that the features work alongside with the existing features
- The team should keep breaking user stories down into small, specific tasks.
- The team should keep having short group meetings to discuss design details.

Work completed/not completed:

Completed:

- As someone looking for events, I want to be able to input a location so that I can see events in a specific area.
- As someone looking for events, I want to be able to expand events in my feed to read more about the event details.
- As someone looking for events, I want to be able to mark an event as "attending" so that I can show the host and other users that I am attending.
- As someone looking for events, I want to be able to search for keywords so that I can find the events that I am looking for.

Not completed:

- As someone looking for events, I want to have an event feed upon opening the app so that I can browse events in my area.

Work completion rate:

Days in sprint: 14

Ideal user stories: 5

Ideal total work hours: 35

Total user stories completed: 4

Total work hours completed: ~44

Ideal user stories per day: 0.35

Ideal work hours per day: 2.5

Actual user stories per day: 0.29

Actual work hours per day: 3.14

Final Burn-up Chart:
