

Sprint 3 Report
Event Hub
2/22/2022

Actions to stop doing:

- The team should stop pushing versions with leftover print statements and unused variables once the development on the corresponding feature is complete.
- The team should stop duplicating code and instead group the code into a shared function.

Actions to start doing:

- The team should agree on a clear design for features before they begin implementing them.
- The team should start using dotenv to separate the API keys from the codebase.
- The team should start being more mindful of our API daily limits so that we don't exceed our plan.

Actions to keep doing:

- The team should keep communicating on discord and updating group members with the progress they've made on tasks.
- The team should keep asking clarifying questions if unsure about how to go about a task or about the task's details.
- The team should keep on maintaining clear code organization to ensure clarity among team members.
- The team should continue testing the main branch whenever new features are pushed onto it to ensure that the features work alongside the existing features.
- The team should keep breaking user stories down into small, specific tasks.
- The team should keep having short group meetings to discuss design details.
- The team should keep peer reviewing each other's code after commits.
- The team should keep calling attention to bugs/errors found in the app
- The team members should keep providing how many hours it actually took them to complete tasks. That way we can add this to the burn-up chart and see how well our estimates of time are matching real time spent on tasks.
- The team should keep documenting the code in order to help other team members understand it.

Work completed/not completed:

Completed:

- As someone attending events, I want to be able to see a list of the events that I am attending so that I can keep track of them.
- As an event host, I want to be able to see a list of the events that I have created so that I can keep track of them
- As an event host, I want to be able to edit and delete events so that I can keep my created events up to date.

- (Carried from previous sprint) As someone looking for events, I want to have an event feed upon opening the app so that I can browse events in my area.
- As someone looking for events, I want to be able to see event addresses and locations on a map so that I can visualize which events are near me.

Not completed:

- As an event host, I want to be able to create events so that I can share them with other people using the app.

Work completion rate:

Days in sprint: 14

Ideal user stories: 6

Ideal total work hours: 29

Total user stories completed: 5

Total work hours completed: 42

Ideal user stories per day: 0.43

Ideal work hours per day: 2.07

Actual user stories per day: 0.36

Actual work hours per day: 3

Final Burn-up Chart:

Burn-up Chart
