

User Story	To Do	In Progress	Done
<p>As a user, I want to be able to create an account so that I can use the platform.</p> <p>As a user, I want to be able to sign in so I can use the app and store my information.</p>			<b>(Everyone)</b> Learn the tools needed to start (React Native, Expo, Node.js, Firebase)
			<b>(Erjie)</b> Create a barebones application
			<b>(Erjie)</b> Set up Firebase project
			<b>(David)</b> Create initial UI when user is logged in.
			<b>(Surya)</b> Create initial UI for event creation tab
			<b>(Erjie)</b> Implement Firebase user authentication
			<b>(Erjie)</b> React Native UI for the sign-in/sign-up screen
			<b>(Sharon)</b> Create forgot password feature
			<b>(Erjie)</b> Create logging out feature
			<b>(Rachel)</b> Implement user email verification feature

<p>As someone looking for events, I want to be able to input a location so that I can see events in a specific area.</p>		<p><b>(Surya) [2 Hours]</b> Ask for permission to track user's location after log-in</p>	
		<p><b>(Rachel) [1 Hour]</b> Approximate user location via ip address if denied</p>	
		<p><b>(Sharon) [1 Hour]</b> Display default location</p>	
		<p><b>(David) [3 Hours]</b> UI for inputting location</p>	
	<p><b>[1 Hour]</b> Store new location</p>
