

# Definition of Done

Product Name: EventHub

For Tasks:

- Corner cases for the task are thought through and dealt with
- Feature has sufficient styling as deemed by team if it involves the UI
- All code to assist with development such as log statements is removed
- Code is pushed onto GitHub
- Team members are notified of the changes
- Commit is accompanied with a helpful message that explains the changes
- No errors or exceptions are present
- Code contains sufficient documentation to help other members understand what it does
- Code complies with the guidelines set by our Coding Standard document
- Passes functional tests
- Code reviewed by another team member
- Non-functional tests passed
- Other parts of the system are tested to ensure that they still function
- Task is moved to the “complete” section of the scrum board and updated with the actual hours spent

For User Stories:

- Product owner accepts user story
- Tests passed
- Acceptance criteria met
- Completed all tasks
- Behavior of the feature matches expected behavior defined by user story
